## Latihan Barisan & Deret 1D

```
Soal 01
                                             Soal 06
n = 7
                                             n = 7
                                                  5
                                                         13 17 * 25
     3
                  11 13
        5
                                             Soal 07
Soal 02
                                             n = 7
n = 7
                                                         16 32 64 128
     4
        6
            8 10 12 14
                                             Soal 08
Soal 03
                                             n = 7
n = 7
                                                     27 81 243 729 2187
           10 13 16 19
     4
        7
                                             Soal 09
Soal 04
                                             n = 7
n = 7
                                                         64 256 * 1024
                                              4 16
            13
               17 21 25
Soal 05
                                             Soal 10
n = 7
                                             n = 7
     5
            9
